

Finish Type

Eco Chrome Series

Economically priced. Eco Chrome Series is electro-plated nickel-chrome finish. This economically priced series is a quality finish that is designed for medium weight display and dry storage.

Chrome series

Attractive & High-Tech Look Chrome is electro-plated nickel-chrome finish. This attractive & high-tech look finish is hard and durable with an economical price. This finish has proven to be favourite and perfect for display and dry storage.

ABS Plastic Mat series

Plastic Mat and its frame contain antimicrobial agent which could protect the finishes from bacteria, viruses, mold, fungi and also other disease organism. This finish can be used in any environment (-29°C to 49°C) and the removable mat could ensure the cleanliness of mat.

Poly Green

“Ten years warranty against rust and corrosion”. Poly Green features green powder epoxy coated over zinc-chromate electro-plating with Microban antimicrobial product protection which is built-in during the manufacturing process. It is designed to last for the life of the product. It utilizes an antimicrobial additive that is effective against a wide range of bacteria, mold and fungi which may cause odors, stains and product degradation.. Poly Green finish is ideal for dry, freezer and cooler storage.

Poly Brite

“Improved version poly brite comes with 3 years warranty against rust”. Poly Brite features silver powder epoxy coated over zinc-chromate electro-plating that ensures a strong durable finish. This series able to handle extremes temperature and moisture environment better. Poly Brite finish is ideal for dry, freezer and cooler storage.

Stainless Steel

Rust & Corrosion Resistance. Stainless steel features electro polishing to its surface. It provides durability and life lasting finish. It handles all moisture and temperature extremes environment resists rust and corrosion which make them an ideal for all type of storage requirement.

How to choose your shelving system

Select a right and perfect shelving system will improve productivity and efficiency of the operation. Understanding and considering the following factors makes it much easier to choose a perfect combination of shelving system.

The physical of stores ~ You need to understand the dimensions and quantities of the stocks you wish to store. The shelving system you choose must fit the storage to ensure the storage area neater and the products easier to locate.

The capacity of shelving system ~ The heavier stores, then the higher density and stronger shelving systems you need.

The environment of storage area ~ Freezer and coolers storage area require rust and corrosion prevention. Eco Chrome and Chrome series are only suitable for dry storage.

Available space and configuration ~ You need to take an accurate measurement of the space and configuration of storage area. Wall system could help to maximize floor storage area.

The accessibility and visibility of storage ~ The design of shelving system could affect the visibility and accessibility of storage. The right shelving system not only make the stock check list clearer but also make loading and unloading easier and faster.
