

IK-DIS45 is the perfect solution to fly problems in restaurants. Flying insects are attracted to the high-intensity UV light and captured by the adhesive board hidden inside.

Covers 180 m2 and should be mounted at least 5 feet above the floor. With 3 units of 15 watts of high intensity UV light is specially designed using stainless steel & steel with powder coated with exterior laser cut decorative design.

This Fly Trap model is just a simple lighting unit that same as our house lighting compare to electrical ZAPPING fly killer. As such, we only use high quality component to ensure performance, durability and reliability.

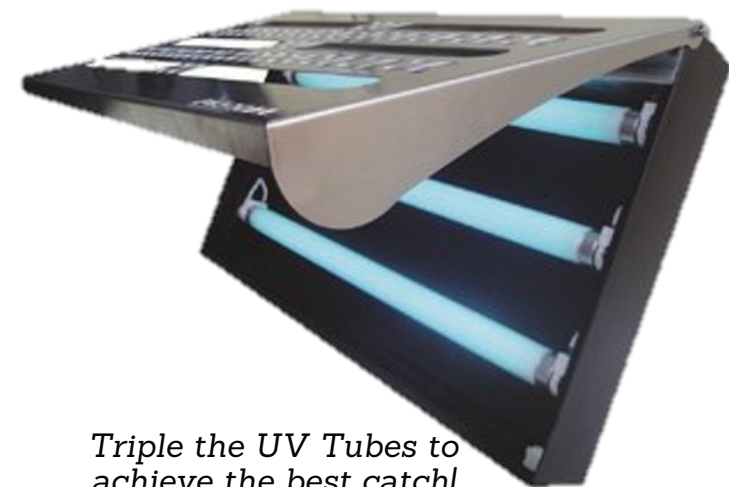

The unique stainless steel cover reduces the glaringness and hence giving it a soft and graceful appearance of the unit.

Compared to existing glueboard nature flies control unit in the market, this unit has a wider glueboard and bigger glueboard . This large area with glue adhesive board are able to resolve the problems of limited catch possibilities.
